PELLET PRO

PELLETIZERS

OVERVIEW

Pellet Pro Pelletizers are revolutionizing the pellet industry due to our pelleting process. We use punch & die technology to produce pellets. Our system requires substantially less energy per ton of product to produce, low maintenance costs to maintain, and simple universal tooling for a wide variety of raw materials. Our control systems are state of the art PLC's with the ability to be controled remotely world wide. From pure oak hardwoods to softwoods and straws we use no binders, additives or steam.

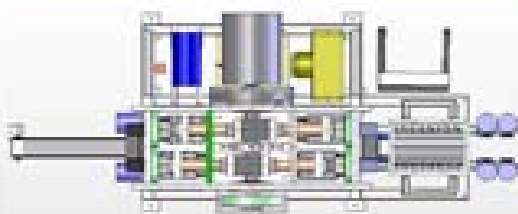

ADVANTAGES

- Lowest energy consumption per ton
- No conditioning chambers or steam
- No additives
- Variable rate output for energy conservation
- Very dense Pellets
- Quick change tooling
- Lower cost tooling
- One set tooling does wide variety of raw materials
- Easy pellet length adjustment (if required)
- Low labour cost
- Can run from central control room
- Low maintenance costs

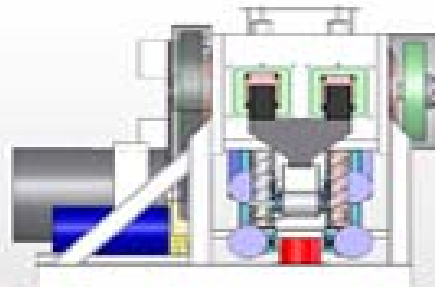

SPECIFICATIONS

Support-	30hp/23kw
Main Drive-	75hp/56kw
Rated Output-	Up to 2 TPH depending on material
Length-	4.75m (187")
Width-	1.91m (75")
Height-	1.42m (56")
Weight-	3628 kg (8000 lbs)
Tooling-	44 punches and dies

4.75m (187")

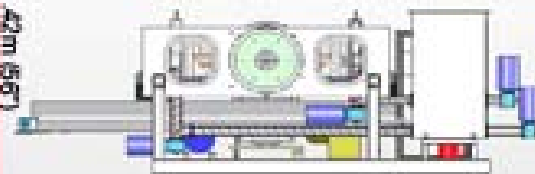

1.91m (75")

3.33m (131")

1.42m (56")

1.42m
